

Hair Routine in 5 steps

Step 1

Your hair care routine will start with **detangling**. To keep the hair from tangling while washing, twist or braid each section once detangled.

Step 2

Then, you will go on to **shampooing** and **conditioning**. Shampoo for 3 lathers to make sure the hair and scalp are clean. Apply your conditioner throughout the hair, then rinse. Deep conditioning should be done at least once a month. Allow the conditioner to sit on the hair for at least 25 mins.

Step 3

Moving on to the **leave-in conditioner**. You want to be sure to apply your leave in conditioner throughout the hair. Focus on the ends then work your way up.

Step 4

Now your hair is ready for your **sealant**, make sure to focus on the ends then work your way up.

Step 5

You can now use your **styler** to set your hair.
